Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 1-12 and 15-23 have been examined.

Continued Examination Under 37 CFR 1.114

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/30/08 has been entered.

Claim Objections

3. Claims 1-12 and 15-23 are objected to because of the following informalities: Claims 1 and 18 disclose software adapted to be installed in the device, the software configured to communicate with **a token**, and **a secure tamper-resistant physical token** local to and removably attachable to the device. It appears that "a token" is referring to "a secure tamper-resistant physical token". Therefore, applicant is advised to amend claims 1 and 18 to disclose "software adapted to be installed in the device, the software configured to communicate with **a secure tamper-resistant physical token**, and **the secure tamper-resistant physical token** local to and removably attachable to the device".

Allowable Subject Matter

4. The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record discloses network usage monitoring switch that is coupled to a computer system and the monitoring device communicates with a network manager to determine whether access should be granted. However, the prior art of record does not explicitly disclose the network monitoring switch is a secure tamper-resistant physical token includes a storage that stores at least one access parameter associated with a first network, and a processor configured to execute an application to determine if said access parameter has been met or exceeded in light of other features disclosed in independent claims 1 and 18. Therefore, claims 1-12 and 15-23 are allowable if the previously stated claim objections are overcome.

Response to Arguments

5. Applicant's arguments, see Amendment, filed 10/30/08, with respect to claims 1-12 and 15-23 have been fully considered and are persuasive. The rejection of claims 1-12 and 15-23 has been withdrawn.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Klein U.S. Pat. No. 6076050 discloses circuit for monitoring the usage of components within a computer system.
